

953

Toughrocks

**Born from rally spirit.
Refined through
craftsmanship.
Built for those who
go beyond the beaten
track.**

**On roads.
Off roads.
Tough roads.**

In 1984, it was not just a car that was born, it was a philosophy. Porsche 953 was never built to be displayed, but to be tested. In the sands of Dakar, where there are no rules, no roads, only what you create yourself.

We are not recreating the past, we are redefining it with the 964. Our off-road project is not just a vehicle, it is an experience, formed from the same spirit, the spirit of challenge and exploration.

**Victorious in Dakar, reimagined
in the red sand dunes of Riyadh,
reengineered at the shore of lake
Constance.**

**This is not just a car.
This is 953 Toughroads.**

Strictly limited. Built to last.

A restomod small series, built in strictly limited numbers. Each of the 77 vehicles is individually configured, handcrafted and finished to the highest standard — a true collector's edition, never to be repeated. Once built, the series is closed forever.

Not a replica. A reinterpretation.

The 953 Toughroads unites the proven technology of the 964 C4 with the iconic look of the Paris-Dakar 953 – individually configured in design, chassis and interior.

A unique combination of classical Porsche DNA, off-road performance and contemporary technology.

Each model is painstakingly handcrafted and individually customised in terms of design, chassis, transmission and interior to reinterpret the spirit of the historic 953.

Fully restored. Relentlessly lightened.

Body, chassis, engine, gearbox — fully restored to the highest standard. Every mechanical component rebuilt, every surface refined. Combined with a focused lightweight reduction, the result is a car that feels as pure as the day it was born. Only better.

The raised chassis, robust bumpers, and underbody protection not only provide increased ground clearance but also give the vehicle a true off-road look.

In combination with the 16" rims and a racing mirror kit, the result is an authentic replica of the historic model.

Authentically Dakar. Radically transformed.

From the outside in, every element of the 953 Toughroads has been reimagined. The backdating kit pays homage to the original – and goes beyond it. Authentic Dakar heritage. True off-road character.

Toughroads is a limited collector's edition that combines automotive history with modern engineering – designed for enthusiasts who want to experience performance, style and a spirit of adventure in an outstanding vehicle.

Built with purpose. Engineered without limits.

The 953 Toughroads brings together air-cooled authenticity, all-wheel-drive capability, purposeful detailing and the intimacy of an individually commissioned build.

Every element is guided by intention: the stance, the materials, the engineering, the visual identity and the way the car makes its driver feel.

The air-cooled boxer, all-wheel drive, 3.6-litre flat-six – Bosch DME injection, light single-mass flywheel, five-speed manual. Everything serves one purpose: pure, unfiltered drive – off roads and on roads.

One car. Many characters.

Roadtrip, city drive, desert sand or deep snow: the 953 Toughroads never flinches and combines off-road capability with effortless everyday elegance.

Created for collectors and drivers who seek authenticity beyond the ordinary, 953 Toughroads combines rally-bred presence, air-cooled character and the personal nature of a bespoke commission.

A legend reimaged. Not repeated.

Engine

Complete rebuild

Replacement of all magnesium parts

Replacement of all wear parts

Cleaning and cosmetic restoration

Installation of a single-mass flywheel

Individual throttle valves

Replacement of fuel injectors

Programmable control unit

Individual air filters in the Toughroads design

Overhaul of the transmission and transfer case

Balancing of the shafts

Technical

Full restoration of body and chassis

Full restoration of mechanical parts including engine and gearbox

Light weight reduction

Exterior

Full restoration of body and chassis

953 Toughroads front and rear carbon bumper based on Dakar style

Tailor-made rear wing kit developed for the 953 Toughroads crafted from glass-fibre

Individually formed carbon side skirts in exclusive 953 Toughroads design

Racing mirror kit with electric adjustment and spherical mirror glass and a fully paintable finish to match each vehicle's individual character

Rear light design featuring an LED light bar with integrated Toughroads lettering

16-inch Braid forged alloy performance rims, designed exclusively for the 953 Toughroads in Dakar style, paired with road-optimised off-road tyres

Exclusive Toughroads suspension kit developed in cooperation with H&R, featuring manually height-adjustable springs and dampers, adjustable top mounts and wishbones for an elevated stance of up to 6 cm

Stainless steel sports exhaust system with manifold and high-mounted layout for improved ground clearance, engineered to enhance off-road capability and equipped with duplex catalytic converters with 200-cell cores

Illuminated license plate frame

Interior

Full restoration of interior close to standard with classic 911 character adopted to the Dakar

A black Alcantara-trimmed dashboard with stitching matched to the chosen design line

Centre console designed exclusively for the 953 Toughroads, featuring a visible carbon fibre panel, a newly adapted climate control system and ventilation nozzles milled from solid aluminium

953 Toughroads door panels with a signature handle design and bespoke window openers, complemented by an additional door pocket in black smooth leather and stitching matched to the chosen design line

Black Alcantara door trim paired with black smooth leather door panels, combining tactile richness with a clean and purposeful finish

Contrast stitching throughout the interior – on the seats, doors, dashboard, steering wheel and gear shift pouch – precisely coordinated with the design line

953 Toughroads gauges in the vehicle's corresponding design, enhanced by LED illumination for a distinctive and contemporary instrument signature

Sport bucket seats in a black Alcantara and smooth leather combination, with carbon fibre seat shells painted to match the exterior and stitching aligned to the selected design line

Black three-spoke Momo Prototipo sports steering wheel, TÜV-approved and trimmed in black smooth leather with stitching matched to the chosen design line

A specially designed black gear shift knob with a black Alcantara shift pouch and stitching coordinated to the design line, available in two lengths

Flooring trimmed in black Alcantara, with smooth leather in high-wear areas, complemented by floor mats in woven carpet with Alcantara edging and stitching in the customer's chosen colour

A full black Alcantara roof lining extending along the A- and B-pillars and continuing through the C-pillars to the lower window

Bolted steel roll bar, available in white or a custom colour, combining structural purpose with FIA-certified safety

Toughroads Bluetooth touchscreen radio with Apple CarPlay, Android Auto and a six-speaker setup

Two variants. Two dimensions of speed.

The 953 Toughroads is available with two engine variants – the P953/32 with 300 PS and the P953/55 with powerful 550 PS.

The 3.6-litre six-cylinder boxer engine is the heart of the Toughroads. It accelerates the rally car from 0 to 100 km/h in 5.1 (or 4.1) seconds. The five-speed manual gearbox and a top speed of 260 km/h ensure a pure driving experience. The all-wheel drive with dynamic power distribution and light single-mass Flywheel also ensures a sense of adventure off the racetrack in the desert sand.
